

Vocabulary: Using Algebraic Expressions

Vocabulary

- Expression – a combination of numbers, variables, and/or operations.
 - For example, $x - 2$, $8m$, $r \div 6$, 7 , $3x + 4$, and $(2 + (\frac{5}{11})^2 - 0.3)$ are all expressions.
- Variable – a letter used to represent an unknown number.
 - For example, in the expression $w + 9$, w is the variable.
