

Vocabulary: Area of Parallelograms

Vocabulary

- Area – the number of square units inside a plane figure.
 - For example, the area of the figure to the right is 15 square units.

- Height (of a quadrilateral or triangle) – the perpendicular distance from a vertex to the opposite side.
 - In parallelogram $ABCD$ shown to the right, the height is 3 units.
 - The side that forms a right angle with the height is called the *base*.

- Parallelogram – a quadrilateral with two pairs of parallel sides.
