## Student Exploration: Riemann Sum

Vocabulary: Riemann sum

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Denise drove 50 miles per hour for 2 hours. How far did Denise travel? $\qquad$
2. A graph of Denise's rate vs. time is shown to the right.
A. What is the area of the rectangle shown in the graph?
$\qquad$
B. How does the area of the rectangle compare to the distance Denise traveled? $\qquad$

## Gizmo Warm-up

The distance above is given by the area of the rectangle. If the area you need is under a curve, it can be tricky to calculate. You can use the areas of rectangles to estimate this area. The sum of the areas of these rectangles is called a Riemann sum. In the Riemann Sum Gizmo, you will use rectangles to estimate the area in specific intervals under a curve.

Suppose you want to find the area under $f(x)=-x^{2}+2 x+3$ from $x=1$ to 2 , as shown to the right. To show this graph in the Gizmo, select $f(x)=-x^{2}+2 x+3$ and Show left-hand sum, and place the arrows under the $x$-axis at 1 and 2 .

1. Use the slider to set the value of $\boldsymbol{n}$ to 5,10, and 15. (To quickly set $\boldsymbol{n}$ to a specific value, type the value in the text box to the right of the slider, and hit Enter.)
A. What happens as $n$ increases? $\qquad$
B. What does $n$ tell you about the graph? $\qquad$
2. The width of each rectangle is called $\Delta x$ ("delta $x$ "), which means "change in $x$." Now vary $\boldsymbol{n}$. How does $\Delta x$ change as $n$ increases? $\qquad$

| Activity A: | Get the Gizmo ready: <br> - Be sure $\boldsymbol{f}(\boldsymbol{x})=-x^{2}+2 x+3$ and Show left-hand <br> sum are selected, and that the arrows under the <br> $x$-axis are at 1 and 2. |
| :--- | :--- |
| - Set $n$ to 7. |  |

1. You can use rectangles to estimate the area under the graph of $f(x)=-x^{2}+2 x+3$ from $x=1$ to 2 . With $\boldsymbol{n}$ set to 7 , you now have a left-hand Riemann sum with 7 rectangles.
A. Is the sum of the areas of these 7 rectangles greater than, less than, or equal to the area under the curve? $\qquad$ Why? $\qquad$
$\qquad$
B. Vary $\boldsymbol{n}$. Is the left-hand sum for a small $n$ or large $n$ closer to the actual area under the curve? $\qquad$ Why? $\qquad$
$\qquad$
$\qquad$
C. Change the bounds (arrows) to $x=0$ and 1 . How is the curve from 0 to 1 different from the curve from 1 to 2 ? $\qquad$
$\qquad$
D. In general, is the left-hand sum an overestimate or underestimate of the area under each of the following types of curves?

Increasing: $\qquad$ Decreasing: $\qquad$
Explain why. $\qquad$
$\qquad$
2. Select Show right-hand sum. (Leave Show left-hand sum selected too.)
A. Vary $\boldsymbol{n}$ and watch the two sums as you do. What do you notice about the sums?
$\qquad$
B. What values of $n$ give the best approximation of the area under a curve? $\qquad$
$\qquad$

## (Activity A continued on next page)

## Activity A (continued from previous page)

3. Turn off Show left-hand sum. Be sure that $f(x)=-x^{2}+2 x+3$ and Show right-hand sum are still selected. Vary the bounds to experiment with both increasing and decreasing portions of this graph.

In general, is the right-hand sum an overestimate or underestimate of the area under each of the following types of curves?

Increasing: $\qquad$ Decreasing: $\qquad$
Explain why. $\qquad$
$\qquad$
4. Select $f(x)=\frac{4}{x+1}$ and set the bounds to $x=1$ and 2. Turn off Show right-hand sum.
A. Do you think a left- or right-hand sum will overestimate the area under this curve? $\qquad$
Why? $\qquad$
$\qquad$
$\qquad$

Select Show left-hand sum and Show right-hand sum to check your answer.
B. Vary $\boldsymbol{n}$. What values of $n$ give a Riemann sum that is the best approximation of the area under the curve? $\qquad$
Explain why this makes sense. $\qquad$
$\qquad$
$\qquad$
C. In theory, how many rectangles would you need in order to find the exact area under a curve? $\qquad$ Explain. $\qquad$
$\qquad$
$\qquad$

|  | Get the Gizmo ready: <br> - On the CONTROLS tab, select $\boldsymbol{f}(\boldsymbol{x})=-\boldsymbol{x}^{2}+\mathbf{2 x}+\mathbf{3}$ <br> and Show left-hand sum. <br> Calculating <br> Riemann sums | - Turn off Show right-hand sum. <br> - Set $n$ to 4, and the bounds (arrows) to 1 and 2. |
| :--- | :--- | :--- |

1. You can estimate the area under the graph of $f(x)=-x^{2}+2 x+3$ from $x=1$ to 2 with a Riemann sum. With $n$ set to 4 , you will estimate the area with 4 rectangles.
A. The width of each rectangle is $\Delta x$, the change in $x$. What is $\Delta x$ ? $\qquad$
B. What five $x$-values evenly divide the interval from $x=1$ to 2 ? 1 , $\qquad$ , $\qquad$
$\qquad$ , 2

These are the boundaries of the rectangles, and are called $x_{0}, x_{1}, x_{2}, x_{3}$, and $x_{4}$.
C. The blue rectangles show the left-hand sum. The height of the left rectangle is $f\left(x_{0}\right)$.

What notation means the heights of the other 3 blue rectangles? $\qquad$
D. Select Show right-hand sum. This sum is the total area of the green rectangles.

What notation means the heights of the 4 green rectangles? $\qquad$
E. In the table to the right, fill in the rectangle widths under $\Delta x$. Then fill in the $x_{i}$ values. Use a calculator to find the rectangle heights $\left(f\left(x_{i}\right)\right)$ and rectangle areas $\left(f\left(x_{i}\right) \Delta x\right)$. To check your answers, click the TABLE tab in the Gizmo.
F. The left-hand sum is the sum of the areas from $i=0$ to 3 . This is given by the notation $\sum_{i=0}^{3} f\left(x_{i}\right) \Delta x$, where $\sum$ is the Greek letter sigma and means "summation."

| $\boldsymbol{i}$ | $\boldsymbol{x}_{\boldsymbol{i}}$ | $\boldsymbol{f}\left(\boldsymbol{x}_{\boldsymbol{i}}\right)$ | $\boldsymbol{\Delta x}$ | $\boldsymbol{f}\left(x_{\boldsymbol{i}}\right) \boldsymbol{\Delta x}$ |
| :---: | :---: | :---: | :---: | :---: |
| 0 | 1 |  |  |  |
| 1 |  |  |  |  |
| 2 |  |  |  |  |
| 3 |  |  |  |  |
| 4 | 2 |  |  |  |

Add the areas of the blue rectangles to find the left-hand sum. Show your work below. Then check your answers in the Gizmo.
$\sum_{i=0}^{3} f\left(x_{i}\right) \Delta x=$ $\qquad$
G. Add the areas of the green rectangles to find the right-hand sum. Show your work below. Then check your answers in the Gizmo.
$\sum_{i=1}^{4} f\left(x_{i}\right) \Delta x=$ $\qquad$
(Activity B continued on next page)

## Activity B (continued from previous page)

2. On the CONTROLS tab, select $\boldsymbol{f}(\boldsymbol{x})=\frac{\mathbf{4}}{\boldsymbol{x}+\boldsymbol{1}}$. Set $\boldsymbol{n}$ to 5 , and the bounds to 0 and 1 .
A. What is $\Delta x$ for this Riemann sum? $\qquad$ Write this in the $\Delta x$ column below.
B. Use $\Delta x$ to fill in the missing $x_{i}$ values. Then use a calculator to find the values of $f\left(x_{i}\right)$ and $f\left(x_{i}\right) \Delta x$. Write all of these values in the table to the right.

When you are done, select the TABLE tab in the Gizmo to check your answers.

| $\boldsymbol{i}$ | $x_{i}$ | $\boldsymbol{f}\left(x_{i}\right)$ | $\Delta x$ | $\boldsymbol{f}\left(x_{i}\right) \Delta x$ |
| :--- | :---: | :---: | :---: | :---: |
| 0 | 0 |  |  |  |
| 1 |  |  |  |  |
| 2 |  |  |  |  |
| 3 |  |  |  |  |
| 4 |  |  |  |  |
| 5 | 1 |  |  |  |

C. Find the left-hand sum (the sum of the blue rectangle areas) in the space below. Be sure to use a sigma $(\Sigma)$ in your answer. Then check your answer in the Gizmo.
D. Find the right-hand sum (the sum of the green rectangle areas) in the space below. Again, be sure to use a $\sum$ in your answer. Check your answer in the Gizmo.
E. Why does the right-hand sum underestimate the area under this curve? $\qquad$
$\qquad$
$\qquad$

| Activity C: | Get the Gizmo ready: |  |
| :--- | :--- | :--- |
| Practice with <br> Riemann sums | $\bullet$ On the CONTROLS tab, select $f(x)=\frac{4}{x+1}$. | $f(x)=\frac{4}{x+1}$ |

In questions 1 through 4 below, you will use a Riemann sum, with 8 rectangles ( $n=8$ ), to estimate the area under the graph of $f(x)=\frac{4}{x+1}$ from $x=1$ to 3 .

1. Use a calculator to fill in the values of $\Delta x, x_{i}, f\left(x_{i}\right)$, and finally $f\left(x_{i}\right) \Delta x$ in the table below.

| $\boldsymbol{i}$ | $\boldsymbol{x}_{\boldsymbol{i}}$ | $\boldsymbol{f}\left(\boldsymbol{x}_{\boldsymbol{i}}\right)$ | $\boldsymbol{\Delta x}$ | $\boldsymbol{f}\left(\boldsymbol{x}_{\boldsymbol{i}}\right) \boldsymbol{\Delta \boldsymbol { x }}$ |
| :---: | :---: | :---: | :---: | :---: |
| 0 |  |  |  |  |
| 1 |  |  |  |  |
| 2 |  |  |  |  |
| 3 |  |  |  |  |
| 4 |  |  |  |  |
| 5 |  |  |  |  |
| 6 |  |  |  |  |
| 7 |  |  |  |  |
| 8 |  |  |  |  |

2. With the help of the table you just made, find the left- and right-hand sums for this function. Show your work in the space below. Then check your answers in the Gizmo.
3. What must be true about the actual area under the graph of $f(x)=\frac{4}{x+1}$ from $x=1$ to 3 ?

Explain. $\qquad$
$\qquad$
4. What can you do to make this estimate more accurate? $\qquad$
$\qquad$
