

Name: _____

Date: _____

Skills Practice: Sources of Scientific Information

Learning goals

After completing this activity, you will be able to ...

- Summarize a source of scientific information.
- Apply scientific information to an issue affecting your own life.

Reporting Scientific Information

Use library or Internet resources to find a newspaper, magazine, or journal article about a new scientific discovery.

Write a two-paragraph report on the article, using the following structure:

- First paragraph: Summarize the main points of the article.
- Second paragraph: Describe at least one way in which you could apply the discovery to your own life or explain how the discovery could impact some aspect of your life.

Turn in your report along with a copy of the article to your teacher.
